

Context Engineering and Context Graphs: The Missing Architecture for Agentic AI

Why Agentic AI Needs More Than Intelligence

Today's AI agents can reason, plan, and act.

Intelligence alone does not create **understanding**.

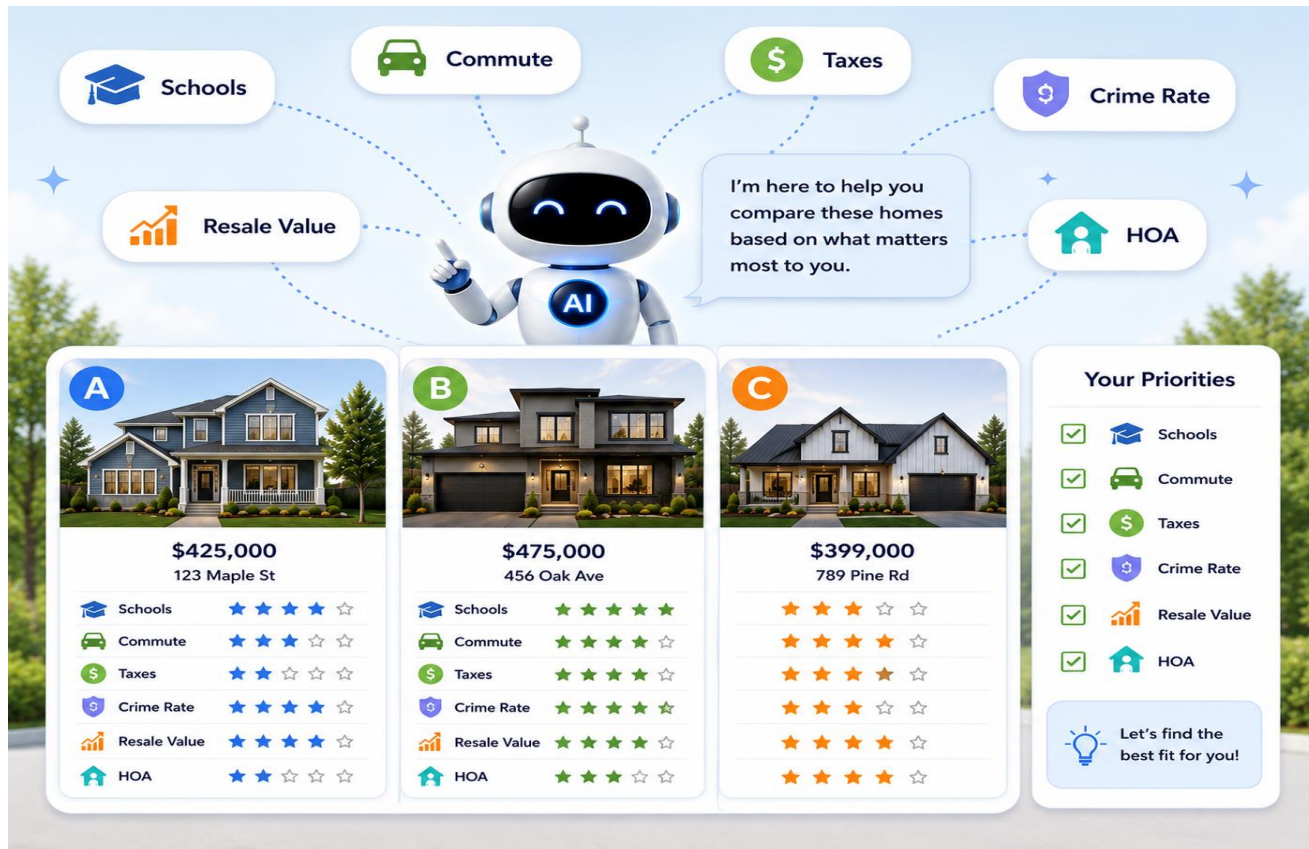

The Missing Architecture

Enterprise knowledge already exists.

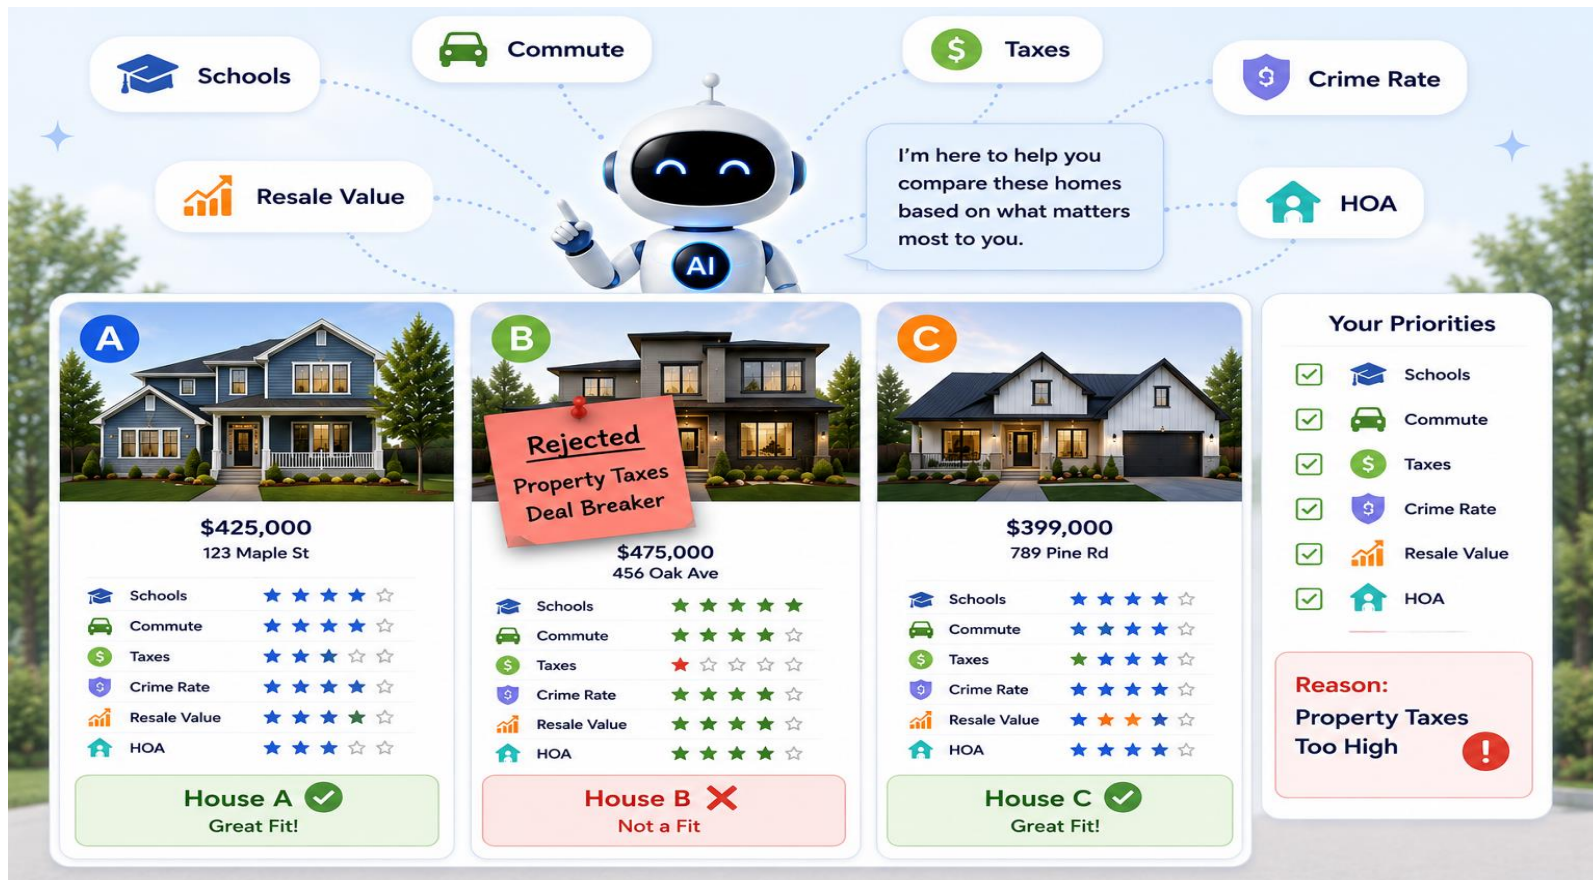

The challenge is connecting information, decisions, history, and reasoning into usable context.

The AI Helped Me Buy a House

We Eventually Eliminated House B

A Week Later, I Asked One Simple Question

Me

Based on everything we've discussed, which house would you recommend?

AI

House B

\$425,000
123 Maple St

Schools	★★★★☆
Commute	★★★★☆
Taxes	★★★★☆☆
Crime Rate	★★★★☆
Resale Value	★★★★☆
HOA	★★★★☆☆

House A ✓
Great Fit!

\$475,000
456 Oak Ave

Schools	★★★★★
Commute	★★★★☆
Taxes	★☆☆☆☆
Crime Rate	★★★★☆
Resale Value	★★★★☆
HOA	★★★★☆☆

House B ✗
Not a Fit

\$399,000
789 Pine Rd

Schools	★★★★☆
Commute	★★★★☆
Taxes	★★★★☆☆
Crime Rate	★★★★☆
Resale Value	★★★☆☆
HOA	★★★★☆☆

House C ✓
Great Fit!

Your Priorities

- ☒ Schools
- ☒ Commute
- ☒ Taxes
- ☒ Crime Rate
- ☒ Resale Value
- ☒ HOA

Reason:

Property Taxes
Too High

The AI Remembered The House. It Forgot The Decision.

 **Decision Summary**

Based on everything we've discussed, I still recommend **House B**.

Remembered ✓

**Price**
You want the best value within your budget. ✓

**Schools**
You prioritized good school ratings. ✓

**Commute**
A shorter commute is important. ✓

**Resale Value**
You want strong long-term value. ✓

**A**
\$425,000
123 Maple St

**B**
\$475,000
456 Oak Ave
Rejected
Property Taxes Deal Breaker

**C**
\$399,000
789 Pine Rd

Forgotten !

**Property taxes**
were a deal breaker.

**Family budget**
constraints.

**Previous decision.**

**Reason for rejection.**

House A ✓
Good Fit

House B ✗
Not a Fit (Rejected)

House C ✓
Good Fit

 **Why House B Was Rejected**
Even though House B scored highest in schools, commute, and resale value, property taxes exceed your acceptable range and were a deal breaker based on your priorities and budget.

 **Key Takeaway**
Remembering all priorities leads to the right decision.

 **Facts**

**B**

House B
\$550K

**Great schools**
Top-rated schools in the area. ✓

**Good commute**
25 minutes to downtown. ✓

 **Missing Context**

**Rejected due to taxes**
Property taxes were a deal breaker. ✗

**Family budget concerns**
Exceeds your comfortable budget range. ✗

**Long-term affordability**
High taxes impact long-term affordability and savings. ✗

**Previous decision**
Previously rejected for the same reasons. ✗

**B**

House B
\$550K

vs.

**Great schools**
Top-rated schools in the area. ✓

**Good commute**
25 minutes to downtown. ✓

**Rejected due to taxes**
Property taxes were a deal breaker. ✗

**Family budget concerns**
Exceeds your comfortable budget range. ✗

**Long-term affordability**
High taxes impact long-term affordability and savings. ✗

**Previous decision**
Previously rejected for the same reasons. ✗

Facts Are Not Context

Facts Are Not Context

The real reason matters.

House B

Property Tax = High

Property taxes were a deal breaker.

Family Budget Impact

Exceeds our budget and hurts long-term affordability.

Decision:
Reject House B

AI remembered:

House B

Property Tax

AI forgot:

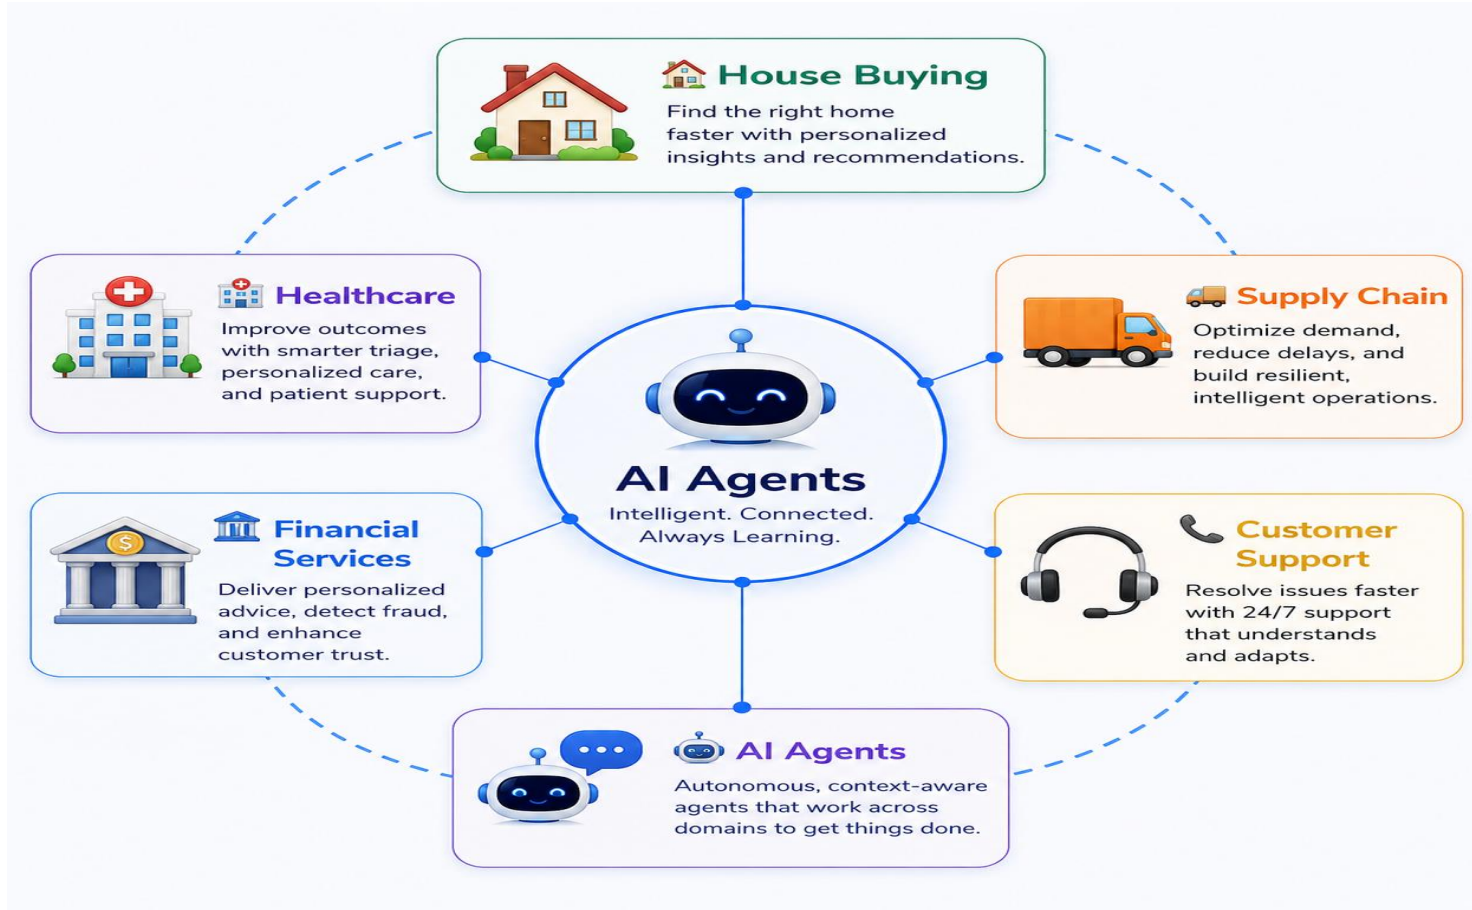

**Why House B
was rejected**

The key context behind the decision
was not retained.

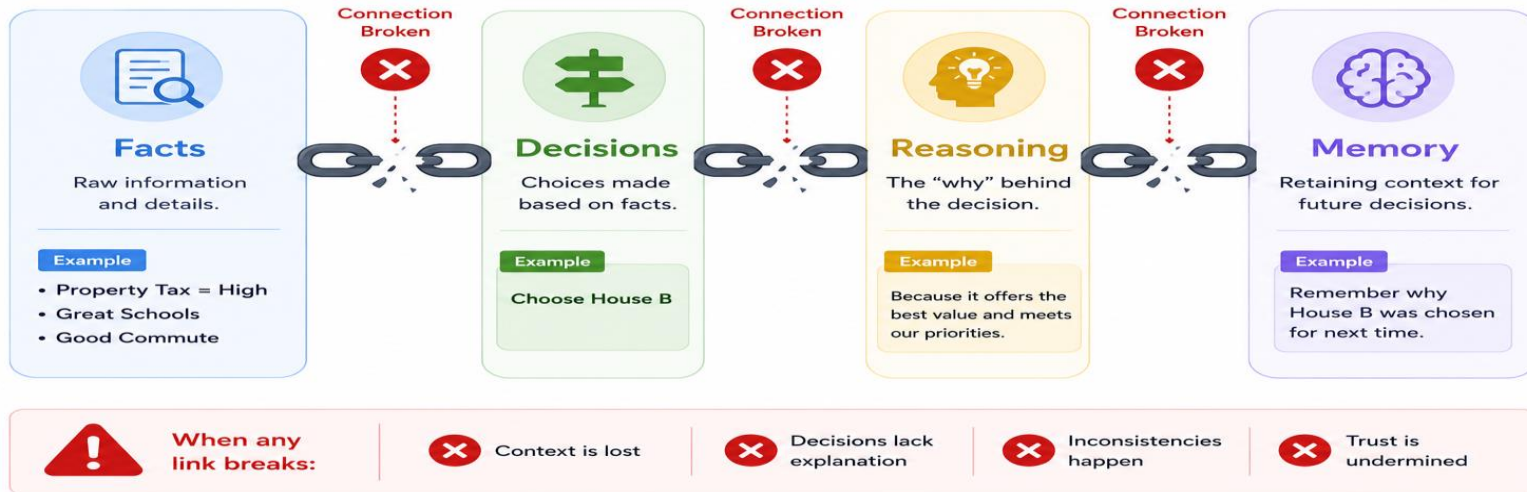

This Is Not A House-Buying Problem

We Don't Have An Intelligence Problem We Have A Context Problem

Broken Chain

When the chain breaks, AI loses the full picture.

The Information Exists. The Context Is Fragmented.

Enterprise Knowledge Lives Everywhere:

 Data

 Documents

 Emails

 APIs

 Policies

 Vector Databases

AI doesn't struggle because information is missing.

AI struggles because context is fragmented.

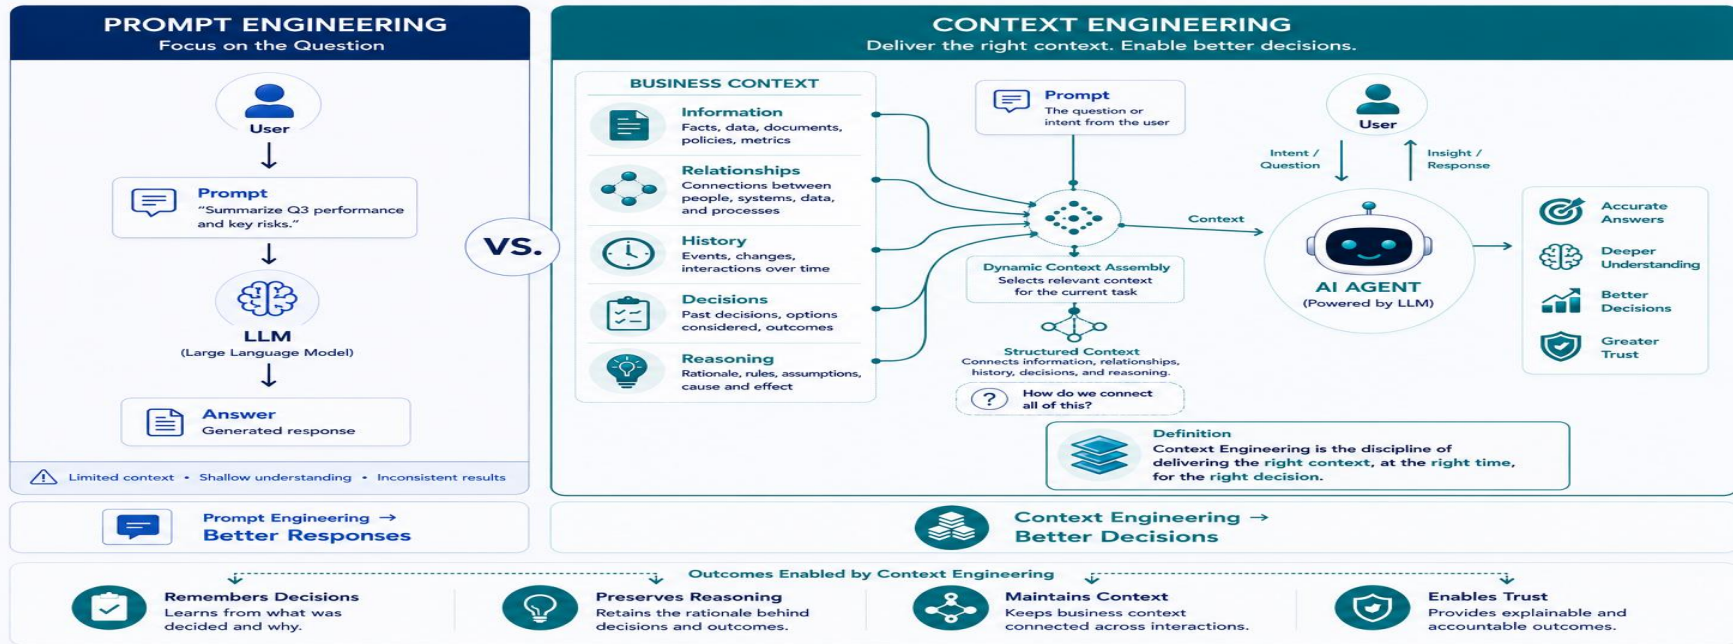

Context Is More Than Information

Context Engineering: Delivering the Right Context at the Right Time

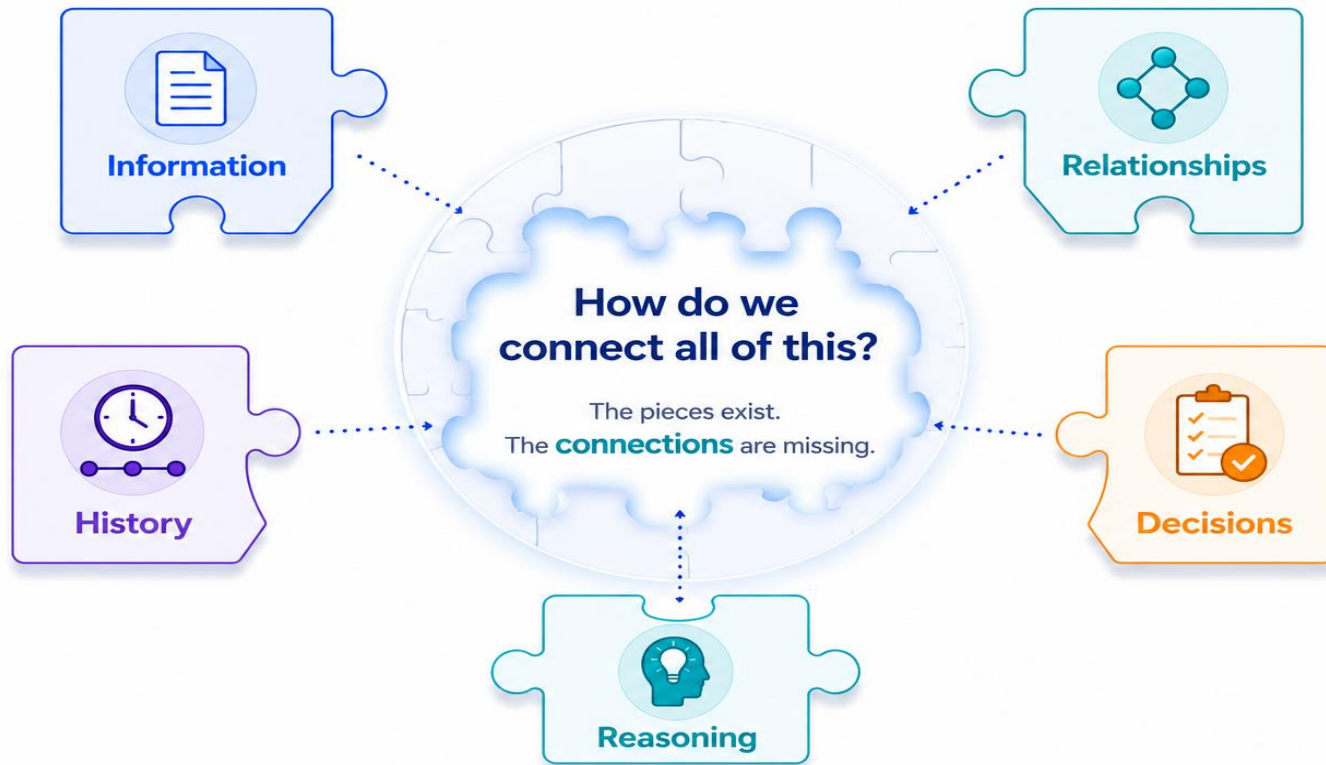

From Prompts to Context. From Answers to Understanding.

Context Engineering powers AI that understands your business.

Prompt Engineering improves responses. Context Engineering improves decisions.

Why Context Needs Structure

Enterprise systems store the **pieces**. AI needs the **connections**.

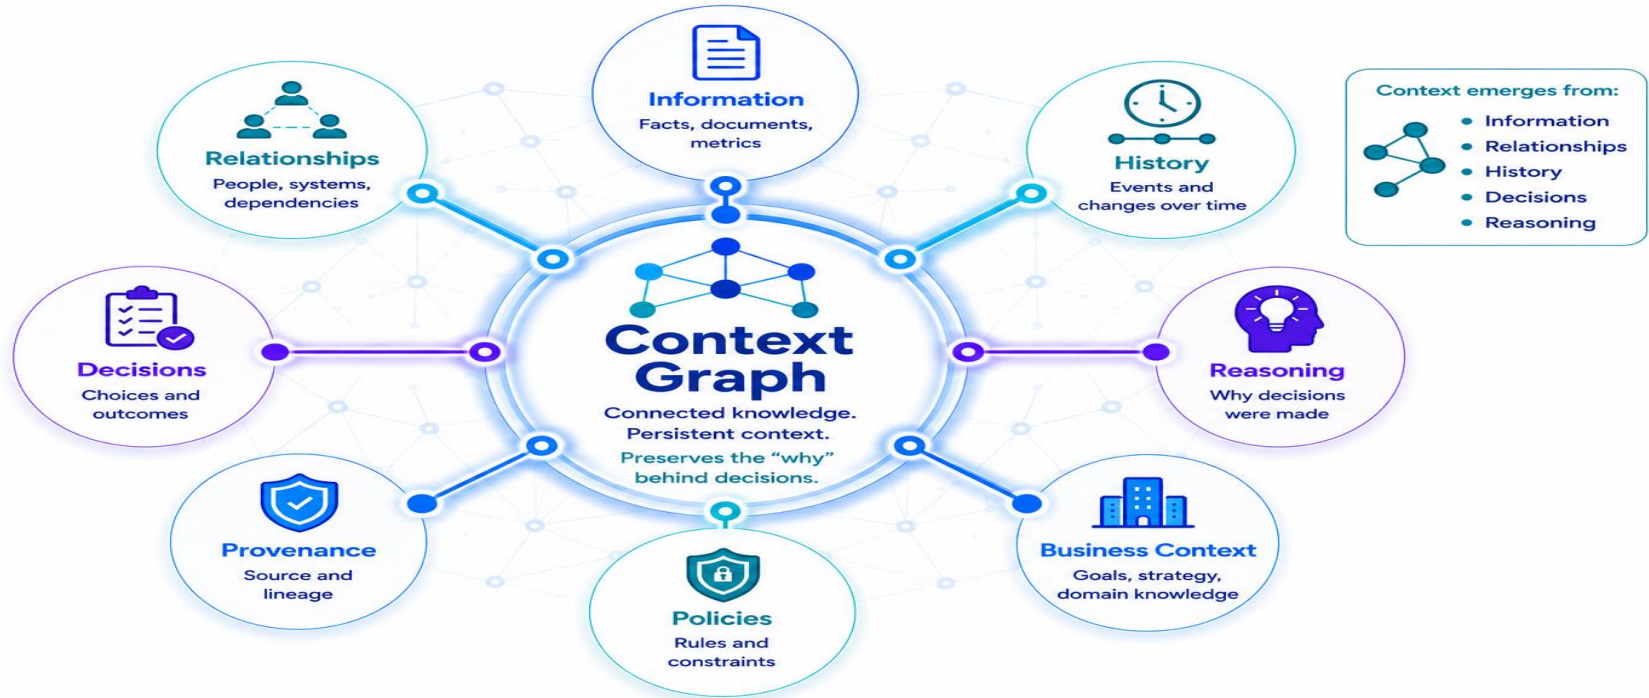

What structure connects all of this?

The answer lies in the connections.

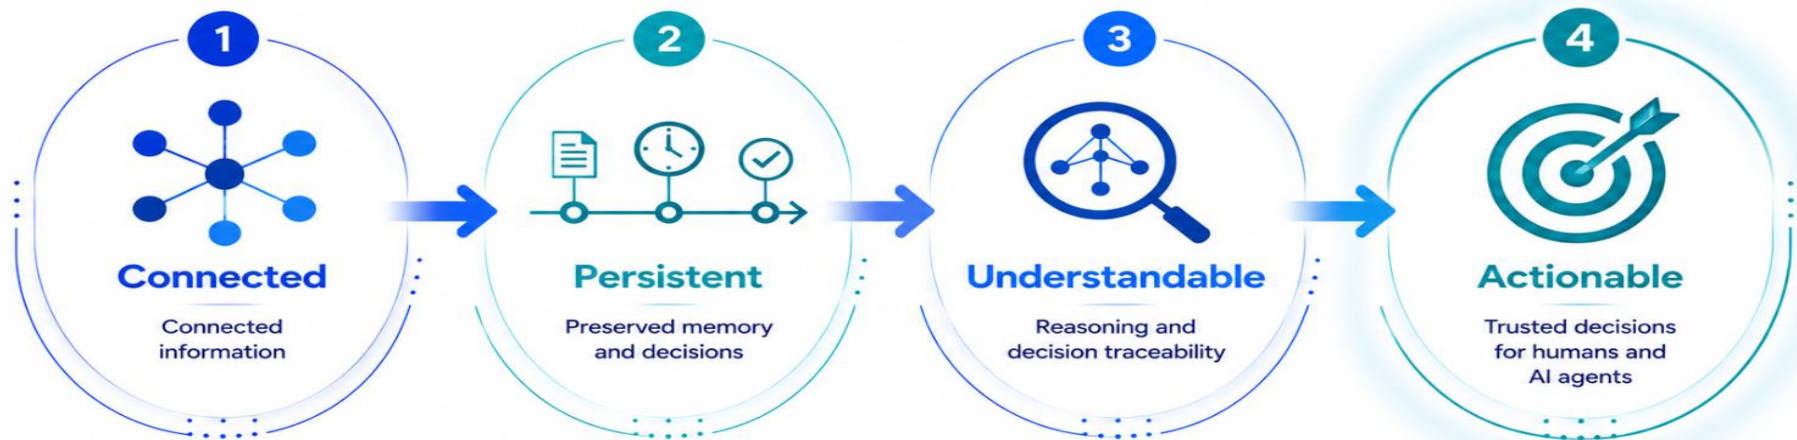

Context Graphs: Connecting the Missing Pieces

The structure that connects information, relationships, history, decisions, and reasoning into persistent context.

Why Context Graphs Matter

Connected context enables understanding, continuity, trust, and better decisions.

Context Graphs transform information retrieval into **contextual understanding**.

Why RAG Alone Is Not Enough

RAG retrieves information. Context Graphs preserve understanding.

Traditional RAG

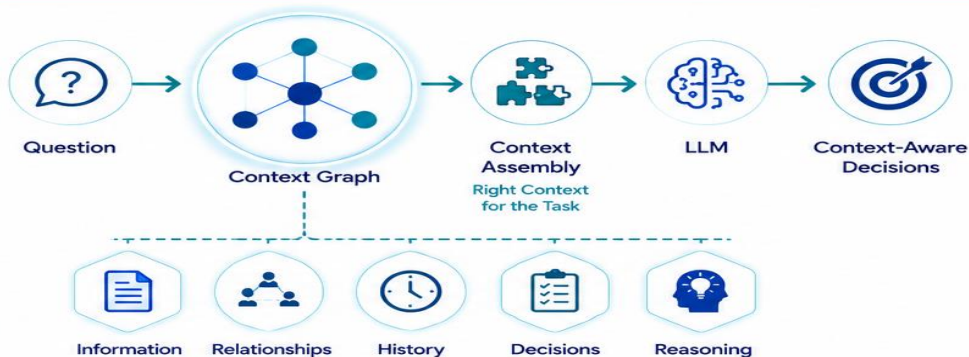

Benefits

- ✓ Finds relevant information
- ✓ Fast retrieval
- ✓ Grounded responses

Limitations

- ✗ Missing relationships
- ✗ Missing history
- ✗ Missing decisions
- ✗ Missing reasoning
- ✗ No persistent memory

Context Graph + RAG

Benefits

- ✓ Connected context
- ✓ Persistent memory
- ✓ Decision lineage
- ✓ Explainable reasoning
- ✓ Trusted recommendations

RAG finds information. Context Graphs provide understanding for humans and AI agents.

Demo

Context Is The New Competitive Advantage

The organizations that preserve context will unlock the greatest value from AI.

CONNECTED CONTEXT. COMPLETE UNDERSTANDING.

Preserve context.

Unlock understanding.

Enable better decisions.
